A Scholastic Stray.

The straw vote taken in the summer school of Columbia University is of unusual interest, since all parts of the country were represented among the eight thousand students gathered there. On presidential preference Wilson led by 1216 to 848 for Hughes. The South and Central states went Democratic by large majorities; the New England and Middle Atlantic states went Republican by smaller majorities. Woman suffrage was carried by 1539 to 347; a remarkable showing, considering that more than a quarter of the students voting came from the South, where suffrage is commonly considered weak. Of the votes against the suffrage, 209 were cast by women and 138 by men. National prohibition received a majority in every state, the total vote being 1566 for and 362 against. On the question of military training in the public schools the vote was more evenly divided, 917 ballots reading "Yes" and 895 reading "No". Of those who took part in the election about three-sevenths were women, mostly school teachers.—Independent.

A few days ago a man applied to us for a loan, who has lived within fifteen miles of Kenna for over a year but has kept his deposit in an eastern town where he formerly lived. We suggested that he float his loan with his Eastern bank, but he said they declined to make the loan because he had moved out of the state. We also declined making the loan because he was a stranger to us so far as his ability and integrity was concerned.

A few days later a stranger came in the bank, introduced himself stating that he was locating near Kenna and WAS going to make this his trading point, and wanted to move his bank account from his former location to this bank, and it was plain to see that he had some business judgement and meant to make the interests of the country his interests by getting acquainted at once and enhancing the value of his own property by patronizing and helping to build up the local institutions; these are the kind of men that are going to make a success because they throw in with their adopted community soul and body, and the HOME BANK, [Not the bank back East] will back them to the very limit, and in any way that is consistent with sound banking business. Come in and give us a trial, we will treat you right if we know how.
